LEVEL III PERSONAL CARE Skills Testing Tools

Intent of Level III Personal Care:

The following material provides parameters for Level III - Personal Care Services as defined in the In-Home Aide Services Standards. It is not intended as a completed Competency Test for a Nurse Aide I, but will provide guidelines for supervisory monitoring of skills. Aides performing this level of service will need to complete the requirements for Nurse Aide I and be registered on the Nurse Aide Registry at the North Carolina Division of Facility Services.

1. ASSIST WITH FEEDING CLIENTS WITH SPECIAL CONDITIONS

Aide	must meet $\underline{\hspace{0.5cm}}$ out of $\underline{20}$ of the numbered steps in order to be considered competent in t	his skill. Date	Date
Dem	onstration	Attempted	Completed
1.	Washed hands.		
2.	Provided equipment needed Bedpan/urinal - Wash water - Oral hygiene items		
3.	Offered opportunity to toilet.		
<u>4.</u>	Offered oral hygiene care.		
5.	Removed unnecessary articles and cleaned surface where food is to be placed.		
6.	Positioned client in chair or in high Fowler's position in the bed with head slightly bent forward.		
<u>7.</u>	Placed napkin under client's chin.		
8.	Placed food on table in front of client (if appropriate) and described the food served.		
9.	Buttered bread and cut meat.		
<u>10.</u>	Placed hot beverages away from client until he/she is ready for it.		
<u>11.</u>	Used different drinking straws for each liquid or used a cup.		
12.	 Held spoon at a right angle: Tested hot foods by dropping a small amount on the inside of wrist before feeding them to the client. Described or showed client each food given. Gave solid foods from point of spoon. Alternated solids and liquids. If client has had a stroke, offered food to the unaffected side and checked for food stored in the mouth. 		
13.	Allowed client to assist with eating according to the Service Plan (e.g. holding bread, or eating finger food, etc.)		
<u>14.</u>	Used napkin to wipe client's mouth as often as necessary.		

1. ASSIST WITH FEEDING CLIENTS WITH SPECIAL CONDITIONS (Continued)

MAKE AN OCCUPIED BED

Aide	must meet $\underline{\hspace{0.5cm}}$ out of $\underline{33}$ of the numbered steps in order to be considered competent in the	nis skill.					
		Date	Date				
<u>Dem</u>	onstration	Attempted	Completed				
1.	Washed hands.						
0	n d						
2.	Put on gloves.						
3.	Collected the following linen:						
J.	a. Mattress pad (if needed) e. Top sheet						
	b. Bottom sheet f. Blanket and/or bedspread						
	c. Plastic drawsheet g. Pillowcase(s)						
	(if needed)						
	d. Drawsheet						
<u>4.</u>	Loosened top linens at the foot of the bed.						
<u>5.</u>	Removed top covers except for top sheet.						
6.	Placed the clean sheet over top sheet. Had the client hold the top edge of						
0.	the clean sheet, if he is able. Slide the soiled sheet out, from top to						
	bottom, and put it in hamper.						
	bottom, and put it in maniper.						
7.	Instructed or turned client onto left side of bed taking adequate						
	precautionary measures to prevent client from rolling off bed (e.g.						
	side rails, another person supporting client on left side of bed, etc.).						
8.	Adjusted pillow under head for comfort of client.						
•							
9.	Loosened bottom linens from the head to the foot of the bed.						
10.	Fan-folded soiled bottom linens one at a time toward the client.						
10.	(Fan-folded mattress pad if needed to be changed.)						
	(Pan-folded mattress pad if freeded to be changed.)						
11.	Placed the bottom sheet on the mattress pad lengthwise so the center is in the						
	middle of the bed. Fan-folded the top part toward the client.						
	• •						
12.	Made a mitered corner at the head of the bed. Tucked the sheet under the						
	mattress from the head to the foot of the bed. (If using a fitted sheet,						
	adequately secured each corner and fan-folded sheet towards center of bed.)						
4.0							
13.	Placed a drawsheet on the bottom sheet. Fan-folded the top part toward						
	the client. Tucked the excess drawsheet under the mattress.						
14.	Instructed or turned client to the right side of bed. (Followed safety						
17.	precautions.)						
							
15.	Adjusted pillow under head for comfort of client.						

3. MAKE AN OCCUPIED BED (Continued)

_		Date	Date
<u>Dem</u>	onstration	Attempted	Completed
<u>16.</u>	Loosened bottom linens. Removed each piece of used linen.		
<u>17.</u>	Straightened and smoothed the mattress pad.		
18.	Pulled the clean bottom sheet toward the aide. Made a mitered corner at the head of the bed. Tucked the sheet under the mattress from the head to the foot of the bed (adapted, if used fitted sheet).		
<u>19.</u>	Pulled the drawsheet tight and tucked under mattress.		
<u>20.</u>	Asked client to move or turned client to the center of the bed.		
21.	Adjusted pillow for the client's comfort.		
22.	Put the top sheet on the bed. (Hem stitching was on the outside.)		
23.	Asked client to hold top sheet. Removed blanket or sheet covering client.		
24.	Placed the blanket on the bed over client. The upper hem was 6 to 8 inches from the top of the mattress.		
<u>25.</u>	Placed the bedspread on the bed. Covered the client.		
26.	Brought the top sheet down over the bedspread to form a cuff.		
27.	At the foot of the bed, lifted the mattress corner with one arm. Tucked the top sheet, blanket, and bedspread under the mattress together. Made a mitered corner. (Loosened linen to allow for movement of client's feet.)		
28.	Followed procedure as described in step #27 on other side of bed.		
29.	Changed the pillowcase(s).		
<u>30.</u>	Asked the client if bed is comfortable.		
31.	Removed dirty linens from the room.		
32.	Removed and disposed of gloves properly.		
<u>33.</u>	Washed hands.

4. ASSIST WITH MOBILITY/GAIT TRAINING USING ASSISTIVE DEVICES

Aide must meet $\underline{}$ out of $\underline{20}$ of the numbered steps in order to be considered competent in this skill.

Dem	onstration	Date Attempted	Date Completed
2011	·············	THOMPtou	Completed
1.	Washed hands.		
2.	Assembled equipment needed: a. Cane b. Walker c. Transfer (Gait) belt		
3.	Checked walker or cane for worn areas or loose parts. Checked rubber tips and rubber hand grips for inadequate tread or cracked or worn areas. Placed the cane or walker close by client.		
<u>4.</u>	Lowered bed to lowest horizontal position.		
5.	Instructed client to turn on his side toward you. Provided only the assistance that was necessary.		
6.	Placed one arm under client's shoulders and the other around the top of client's knees.		
7.	Instructed client to use his arms to raise up. At the same time, raised client's shoulders by placing forearms under arm and moved legs off bed. Assisted client to a sitting position.		
8.	Assisted client, as necessary, to dress and put on sturdy, nonslip shoes.		
9.	Applied the transfer (gait) belt, if necessary.		
<u>10.</u>	Instructed client to lean slightly forward and put feet slightly back.		
11.	Stood in front of client and placed both hands in the gait belt with an underhand grasp.		
<u>12.</u>	Blocked client's feet with aide's own feet to prevent them from sliding out.		
13.	Instructed client to "push off" the bed with hands. Assisted client to stand.		
<u>14.</u>	Handed client the cane or placed the walker in front of him within reach.		

4. ASSIST WITH MOBILITY/GAIT TRAINING USING ASSISTIVE DEVICES (Continued)

<u>Dem</u>	onstration	Date Attempted	Date <u>Completed</u>
15.	Checked for a 30 degree angle of elbow once client had hands placed on the cane or walker.		
16.	Instructed client to use cane on strong side, advancing the cane 10 to 18 inches followed by weaker leg and then strong leg.		
17.	When using a walker, had client advance the walker about 10 to 18 inches. Client then moved weaker leg forward into the walker, followed by the stronger leg.		
18.	If client had gait belt on, aide stood on the client's weaker side and slightly in back, with hands in the belt.		
19.	After ambulation, returned client to bed or chair. Had client walk within a step of the bed or chair.		
<u>20.</u>	Placed the cane or walker to the side and assisted client to turn around.		
21.	When client felt the bed or chair touching the back of his legs, aide had him reach for the arms of the chair or the mattress and lower himself into the chair or bed.		
22.	Removed gait (transfer) belt.

5. ASSIST WITH RANGE OF MOTION EXERCISES

Aide must meet $\underline{\hspace{0.5cm}}$ out of $\underline{22}$ of the numbered steps in order to be considered competent in this skill.

D	and the state of	Date	Date
Dem	nonstration	Attempted	Completed
1.	Washed hands.		
2.	Obtained blanket.		
3.	Lowered side rail (if used).		
4.	Positioned client in supine position. Made sure body was in good alignment.		
<u>5.</u>	Covered client with blanket.		
6.	Exercised neck: a. Placed hands over client's ears to support the head. b. Flexed the neck by bringing the head forward so chin touched chest. c. Extended neck by straightening head. d. Hyperextended neck by bringing the head backward until chin up. e. Rotated neck by turning head from side to side. f. Moved head from right and to left for lateral flexation. g. Repeated 5-6 times.		
7.	 Exercised shoulder: a. Grasped client's wrist with one hand and elbow with the other. b. Flexed shoulder by raising arm straight in front and over client's head. c. Extended shoulder by bringing arm down to client's side. d. Hyperextended shoulder by moving arm behind body. e. Abducted shoulder by moving straight arm away from side of the body. f. Adducted shoulder by moving straight arm to the side of body. g. Rotated shoulder internally by bending elbow and placing it at the same level as the shoulder. Moved forearm down toward body. h. Rotated shoulder externally by moving forearm toward head. i. Repeated 5-6 times. 		
8.	Exercised the elbow: a. Grasped client's wrist with one hand and the elbow with the other. b. Flexed elbow by bending arm so that shoulder was touched. c. Extended elbow by straightening arm. d. Repeated 5-6 times.		

5. ASSIST WITH RANGE OF MOTION EXERCISES (Continued)

Rotated hip externally by turning leg outward.

Repeated 5-6 times.

Date Date Demonstration Attempted Completed 9. Exercised forearm: Turned client's hand so palm was down for pronation. Supinated the joint by turning the palm up. Repeated 5-6 times. 10. Exercised wrist: Held client's wrist with both hands. b. Flexed wrist by bending hand down. Extended wrist by straightening hand. Hyperextended wrist by bending the hand back. Turned hand toward thumb for radial flexion. Turned hand toward little finger for ulnar flexation. Repeated 5-6 times. 11. Exercised thumb: Held client's hand with one hand and thumb with the other. Abducted the thumb by moving it out from inner part of index finger. Adducted thumb by moving it back next to index finger. Touched each finger tip with client's thumb to achieve opposition. Flexed thumb by bending it into client's hand. Extended thumb by moving it out to the side of the fingers. Repeated 5-6 times. 12. Exercised fingers: Abducted fingers by spreading them and the thumb apart. Adducted the fingers by bringing the fingers and thumb together. Extended fingers by straightening them so that fingers, hand, and arm are straight. Flexed fingers to make a fist. Repeated 5-6 times. 13. Exercised the hip: Placed the hand under the client's knee and the other under the ankle to support the leg. Flexed hip by raising leg. b. Extended hip by straightening leg. Abducted hip by moving leg away from body. Adducted hip by moving leg toward the body. Rotated hip internally by turning leg inward. f.

6-B. ASSISTING CLIENT WITH AN "IV" LINE WITH DRESSING Aide must meet ___ out of 12 of the numbered steps in order to be considered competent in this skill. Date Attempted Completed If assisting a client with an IV line with undressing, the following steps must be followed to prevent disturbing the IV site or the continuous flow of IV fluids: Removed clothes from opposite side of body toward arm with IV line 2. Gathered gown at arm and slipped downward over arm and line. (Did not disturb IV line.) 3. Gathered material of gown or shirt in one hand forming a tunnel preventing any pull or pressure on the line. With free hand, lifted IV fluids from the IV pole and slipped gown or shirt over the IV fluid container. (Did not lower IV fluid container but raised the article of clothing.) Replaced IV fluid container on IV pole. 5. Assisted client, as needed, to remove the remainder of clothes. To dress client, the following steps must be followed if the gown or shirt is to go over the arm with the IV: Gathered the sleeve on the IV side in one hand. Lifted the IV fluid container free of the IV pole, maintaining height.

Date

7-B. TAKE/RECORD PULSE

Aide must meet	out of 8 of the	numbered sten	s in order to be	considered con	npetent in this skill.
muc must meet	out of our the	mumbered step	s in oraci to be	constact ca con	ipetent in tino omin

Dem	onstration	Date Attempted	Date Completed
1.	Washed hands.		•
2.	Collected equipment: a. Watch with second hand b. Paper and pen.		
3.	Located the radial pulse with middle three fingers.		
4.	Counted radial pulse for 30 seconds or for one full minute, if pulse was irregular.		
<u>5.</u>	Multiplied number counted by two if pulse was taken for 30 seconds.		
6.	Recorded date, time and pulse rate, irregular beats, etc. according to the service plan and/or agency policy.		
7.	Washed hands.		
8.	Reported pulse according to agency policy or service plan.

7-C. TAKE/RECORD RESPIRATIONS

Aide must meet $\underline{}$ out of $\underline{10}$ of the numbered steps in order to be considered competent in this skill.

Dem	onstration	Date Attempted	Date Completed
1.	Continued to hold client's wrist after taking radial pulse. Kept stet hoscope to chest if apical pulse was taken.		
2.	Did not tell client respirations were being counted.		
3.	Began counting when chest rose. Counted each rise and fall of chest as one respiration.		
4.	Observed if respirations were regular and equal. Noted depth and if client had any pain or difficulty in breathing.		
5.	Counted respirations for 30 seconds. Multiplied by two.		
6.	Counted for one (1) full minute, if infant, or if respirations are abnormal or irregular.		
<u>7.</u>	Made sure client was comfortable.		
8.	Washed hands.		
9.	Reported to nurse (as soon as possible) if: a. Respiration rate was outside of rates outlined in the care plan. b. Respirations were unequal, shallow, etc. c. Respirations were regular or irregular. d. Client had any pain or difficulty breathing. e. Any respiratory noises. f. Any abnormal patterns.		
10.	Recorded respiratory rate according to agency policy or service plan.

7-D. TAKE/RECORD BLOOD PRESSURE

Aide must meet $\underline{}$ out of $\underline{19}$ of the numbered steps in order to be considered competent in this skill.

Dem	onstration	Date Attempted	Date Completed
1	Washed hands.	*	•
2.	Collected equipment: a. Sphigmomanometer b. Stethoscope c. Alcohol Wipes		
3.	Cleaned earpiece and diaphragm of stethoscope with alcohol wipes.		
<u>4.</u>	Positioned client's arm so that it was at the level of the client's heart.		
5.	Exposed the upper arm.		
6.	Squeezed the cuff to expel any remaining air. Closed the thumb valve.		
<u>7.</u>	Located the brachial artery.		
8.	Placed the arrow marking on the cuff over the brachial artery. Wrapped the cuff around the arm at least one inch above the elbow.		
9.	Placed the manometer on a flat surface (or attached to hook on cuff).		
<u>10.</u>	Placed the earpieces in ears.		
<u>11.</u>	Placed the diaphragm of the stethoscope over the brachial artery.		
12.	Quickly inflated the cuff until gauge registers 180 mm/Hg or 20 mm/Hg above palpated systolic pressure.		
13.	Deflated the cuff slowly by turning valve of bulb counterclockwise.		
14.	As cuff is deflated, listened and noted on gauge the first heart sound.		
15.	Continued to release air pressure slowly until heard an abrupt change in the sound from very loud to a soft muffled sound (or noted on gauge the last sound heard).

7-E. TAKE/RECORD HEIGHT

Aide must meet $__$ out of $\underline{13}$ of the numbered steps in order to be considered competent in this skill.

Dem	onstration	Date Attempted	Date Completed
1.	Washed hands.	•	•
2.	Collected equipment: a. Portable height measurement rod b. Paper towels c. Paper and pen		
3.	Placed paper towels on floor or scale platform.		
4.	Asked client to remove shoes. Provided assistance.		_
5.	Raised height measurement rod.		
6.	Assisted client to stand on paper towels.		
7.	Assisted client to stand very straight.		
8.	Lowered height measurement rod until it rested on client's head.		
9.	Recorded height on paper.		
10.	Helped client to put on shoes.		
11.	Made sure client was comfortable.		
12.	Washed hands.		
13.	Recorded height according to agency policy or service plan.

10-A. ASSISTING WITH APPLYING ACE (ELASTIC) BANDAGES

Aide must meet $\underline{}$ out of $\underline{12}$ of the numbered steps in order to be considered competent in this skill.

Dom	onstration		Date Attempted	Date Completed
			Attempted	Completed
1	Washed hands			
2.	Collected equipment a. Ace (elastic) bandage determined by nurse b. Tape, metal clips, or safety pins			
3.	Assisted client to comfortable position. Exposed extremity to be bandaged.			
4.	Made sure area was clean and dry.			
5.	Held bandage so that roll was up and loose end on the bottom.			
6.	Applied bandage to smallest part of extremity to be bandaged.			
7.	Made two (2) circular turns around the part of the extremity to be bandaged.			
8.	Made overlapping spiral turns in an upward direction. Each turn should overlap about two-thirds of the previous turn.			
9.	Applied bandage smoothly with firm, even pressure. Bandage should not be tight.			
<u>10.</u>	Pinned, taped, or clipped the end of bandage to hold it in place.			
11.	Checked fingers or toes for coldness or cyanosis. Also checked for client complaints of pain, numbness, or tingling. Removed bandage if any of these were noted. Reported observations to nurse as soon as possible.			
<u>12.</u>	Washed hands.

11-A. ASSIST WITH SCALP CARE (CHAIR SHAMPOO)

Aide must meet $\underline{\hspace{0.5cm}}$ out of $\underline{27}$ of the numbered steps in order to be considered competent in this skill.

Dem	onstration	Date Attempted	Date Completed
1.	Washed hands.	•	•
2.	Collected equipment: a. Two bath towels b. Face towel or washcloth folded lengthwise. c. Shampoo d. Hair conditioner, if requested e. Pitcher or hand-held nozzle f. Comb and brush g. Hair dryer (if available)		
3.	Put on gloves (according to agency policy).		
<u>4.</u>	Arranged the equipment in a convenient location.		
<u>5.</u>	Positioned the client in front of the sink.		
6.	Placed a bath towel across the shoulders or across the pillow under the client's head.		
7.	Brushed and combed hair thoroughly to remove snarls and tangles. (See Level II Skills Competency Test #12)		
8.	Obtained supply of warm water or used sink faucet/hose.		
9.	Asked client to hold the face towel or washcloth over the eyes.		
10	Applied water to hair until it was completely wet. Used pitcher or nozzle.		
<u>11.</u>	Applied a small amount of shampoo.		
12.	Worked up a lather with both hands. Started at the hairline and worked toward the back of head.		
<u>13.</u>	Massaged the scalp by applying pressure with fingertips.		

11-A. ASSIST WITH SCALP CARE (CHAIR SHAMPOO) (Continued)

<u>Dem</u>	onstration		ate ttempted	Date Completed
14.	Rinsed the hair with water.			
15.	Repeated steps 11-13.			
16.	Rinsed the hair thoroughly.			
17.	Applied conditioner, if desired, and rinsed as directed on the container.			
18.	Wrapped the client's head with a bath towel.			
19.	Dried his or her face with the towel or washcloth used to protect eyes.			
20.	Helped the client raise head (if appropriate).			
21.	Rubbed the hair and scalp with the towel. Used the second towel if the first one became excessively wet.			
<u>22.</u>	Combed the hair to remove snarls and tangles.			
23.	Dried hair as quickly as possible.			
24.	Assisted client to desired location.			
<u>25.</u>	Cleaned and returned equipment to its proper place.			
<u> 26.</u>	Removed gloves and washed hands according to agency policy.			
27.	Recorded date, time, and place where the shampoo was given (sink, shower, tub, etc.), and client's tolerance of procedure. Reported to nurse, as soon as possible, any problems noted regarding client's tolerance of the procedure.

11-B. ASSISTING WITH SCALP CARE (BED SHAMPOO) Aide must meet $__$ out of $\underline{30}$ of the numbered steps in order to be considered competent in this skill.

Dem	onstration	Date Attempted	Date Completed
1.	Washed hands.		
2.	Assembled equipment:		
	a. Shampoo		
	b. Washcloths		
	c. 3 bath towels		
	d. Bath blanket		
	e. Safety pin		
	f. Waterproof covering for pillow		
	g. Large basin to collect used water		
	h. Hair dryer (if available)		
	i. Hairbrush and comb		
	j. Small empty pitcher or cup		
	k. Larger pitcher of water (115 degrees F.)		
	l. Shampoo tray - (plastic sheeting that has the top and two sides		
	rolled forming a drain may be used if regular tray is not available)		
3.	Put on gloves (according to agency policy).		
<u>4.</u>	Placed large, empty basin on floor under spout of shampoo tray.		
5.	Arranged on bedside table within easy reach:		
	a. Pitcher of water (115 degrees F.)		
	b. Washcloth		
	c. Shampoo		
	d. 2 bath clothes		
	e. Empty pitcher		
6.	Replaced top bedding with a washable (bath) blanket.		
7.	Safely positioned client at side of bed.		
8.	Replaced pillowcase with waterproof covering.		
9.	Covered head of bed with bed protector. (Protector was placed under		
	shoulders of client.)		
<u>10.</u>	Loosened clothing around neck.		
11.	Placed towel under client's head and shoulders. Brushed hair free of		
	tangles, working snarls out carefully.		
12.	Brought towel down around client's neck and shoulders and pinned.		
16.	Positioned pillow under shoulders so that head is tilted slightly backward.		
	p under birourders so that nead is three singlity buch value		

11-B. ASSISTING WITH SCALP CARE (BED SHAMPOO) (Continued)

Dem	onstration	Date Attempted	Date Completed
<u>13.</u>	Raised bed to high horizontal position, if applicable.		
14.	Raised client's head and positioned shampoo tray so that drain is over the edge of bed directly above basin.		
<u>15.</u>	Gave client washcloth to cover eyes.		
16.	Using the small pitcher, poured a small amount of water over hair until thoroughly wet. Used one hand to help direct the flow away from the face and ears.		
17.	Applied a small amount of shampoo, working up a lather. Worked from scalp to hair ends.		
<u>18.</u>	Massaged scalp with tips of fingers. Did not use fingernails.		
19.	Rinsed thoroughly, pouring from hairline to hair tips. Directed flow into drain. Used water from pitcher, checking water temperature before using.		
<u>20.</u>	Repeated the procedure a second time.		
21.	Lifted client's head. Removed tray and bed protector. Adjusted pillow and slipped a dry bath towel underneath head.		
22.	Placed tray on basin. Wrapped hair in towel. Dried face, neck, and ears as needed.		
23.	Dried hair with towel. (May use of a portable hair dryer if available. If used hair dryer, did not put it too close to the client's hair.)		
24.	Combed hair appropriately. Removed protective pillow cover. Replaced with cloth cover.		
<u>25.</u>	Replaced bedding as needed. Removed washable (bath) blanket.		
<u>26.</u>	Lowered height of bed (if applicable).		
27.	Helped client assume a comfortable position.		
28.	Cleaned and returned equipment to its proper place		
<u>29.</u>	Removed gloves and washed hands according to agency policy.

17. BLADDER/BOWEL RETRAINING

Aide must meet	out of 9 of th	e numbered ste	ps in order to	be considered	competent in th	is skill.

Dam	and the biom	Date	Date
Dem	onstration	Attempted	Completed
1.	Discussed with client what s/he knows about bladder (bowel) retraining and if s/he wants assistance with this procedure. (If client cooperated, proceeded with retraining.)		
2.	Recorded client's incontinence times, based on observed experience or client's report.		
3.	Reviewed with client/family the procedure to follow so that it could be maintained in aide's absence.		
4.	 Provided client the opportunity to void: a. Offered bedpan or assisted to bathroom one hour before times when incontinence had been known to occur. (See Step #2.) b. Nocturnal incontinence for male: left urinal in easily accessible spot; awakened client one hour before noted incontinence times. 		
5.	Fluid control with physician approval: a. Forced fluids during the daytime hours b. Restricted fluids at night c. Assisted client with fluid control only if on the service plan d. Observed for signs of dehydration		
6.	 Provided proper positioning of client during elimination: a. Sat client upright, with hips and knees flexed, and feet flat for support. (If client able to sit on bedside commode or on bedpan placed on edge of bed, have feet resting on a footstool.) b. Used a raised toilet seat, if more comfortable for client. c. Provided support for male client while standing to void. d. Padded the bedpan or used a "fracture" pan if client had to remain in bed during elimination. 		
7.	Provided some or all of the following stimuli to help start the flow of urine and completely empty the bladder: a. Offered a glass of water to drink. b. Poured a measured amount of water over the perineum. c. Ran water in the sink so the client could hear it.		

17.	BLADDER	/BOWEL	RETRAINING	(Continued)

		Date	Date
Demor	nstration	Attempted	Completed
	d. Helped client to lean forward. Gently stroked the inner thigh, or		
	tickled the side of the urinary meatus with a wisp of cotton.		
	e. Encouraged the resident to bear down at the end of voiding to		
	completely empty the bladder.		
	f. Placed the client's hand in water.		
8.	Assisted client with washing perineal area immediately after an incontinent episode. Provided a fine dusting of non-perfumed		
	powder or a cream as prescribed by a physician to prevent excoriation.		
	powder of a cream as prescribed by a physician to prevent exconation.		
9.	Reinforced bladder exercises according to service plan.		
NOTE:	Providing regularity to daily activities is the key to bowel retraining. Bowel retraining a proper diet, exercise, accessibility to the lavatory. Proper position a the feeling of security. Privacy and an unhurried atmosphere are extremely help	and guardrails for s

21-B. TRANSFERRING A CLIENT FROM BED TO CHAIR {Using a Gait (Transfer) Belt}

Aide must meet $__$ out of $\underline{17}$ of the numbered steps in order to be considered competent in this skill.

Dem	onstration	Date Attempted	Date Completed
		<u>-</u>	
1.	Washed hands.		
2.	Put on gloves (if possible contact with blood or body fluids).		
3.	Provided privacy.		
<u>4.</u>	Explained procedure to client.		
5.	Placed chair beside bed facing foot of bed on same side as client's strongest side.		
6.	Used gait belt of the proper size.		
7.	Assisted client into a sitting position by placing (assistant's) arm closest to the head of the bed around the client's shoulders, and the other arm under the client's knees. Slowly and smoothly pivoted the client toward the side of the bed to a sitting position. Remained facing the client to prevent a fall.		
8.	Placed gait belt around client's waist. Slipped end of belt through serrated portion of clasp and then through metal buckle.		
9.	Pulled belt through entirely and checked to be sure that belt was smooth and snug. Tested the fit of the belt by inserting fingers between belt and patient. (If putting gait belt around female client, checked to be sure that the belt was around the waist and not around the breasts.)		
<u>10.</u>	Put on client's slippers or shoes.		
11.	Assisted the client to stand by grasping the gait belt on either side as the client puts hands on the shoulders or upper arms of the assistant.		
12.	Kept back straight and base of support broad while assisting client to a standing position.		
<u>13.</u>	Pivoted client toward chair, checking the security of belt.

21-C. LIFTING A CLIENT USING A MECHANICAL LIFT

Aide must meet $\underline{}$ out of $\underline{23}$ of the numbered steps in order to be considered competent in this skill.

Dem	onstration	Date Attempted	Date Completed
1.	Obtained assistance from a person approved (by supervisor) to help with the lifting and transferring of the client using a mechanical lift.	Tattomptou	Jompietea
2.	Washed hands.		
3.	Put on gloves (if possible contact with blood or body fluids).		
<u>4.</u>	Provided privacy.		
<u>5.</u>	Explained procedure to client.		
6.	Checked mechanical lift, sling, straps and chains for frayed areas or poorly closing clasps. Did not use defective equipment and reported this to the supervisor.		
7.	Placed a chair at right angles to the foot of the bed, facing the head (if using wheelchair, locked wheels).		
8.	Elevated the bed (if possible) to a comfortable working height. Locked the wheels of the bed. Lowered the nearest side rail. Rolled the client toward assistant.		
9.	Positioned sling(s) beneath the client's body behind the shoulder, thighs and buttocks, smoothing sling while positioning it under client.		
10.	Rolled the client back onto the sling and positioned properly under shoulders and hips.		
11.	Positioned the lift frame over the bed with legs in maximum open position and locked.		
<u>12.</u>	Attached suspension straps to sling. Checked fasteners for security.		
13.	Attached suspension straps to the frame. Positioned the client's arms inside the straps.		
<u>14.</u>	Secured restraint straps, if needed.		

21-C. LIFTING A CLIENT USING A MECHANICAL LIFT (Continued)

Dem	onstration	Date Attempted	Date Completed
<u>15.</u>	Talked to the client while slowly lifting the client free from the bed.		
16.	Gently guided client's legs and shoulders until client was in a sitting position.		
17.	Guided the lift away from the bed.		
18.	Positioned the client close to the chair.		
19.	The second assistant held the sling and helped lower the client slowly into the chair. Made sure that client's hands and feet were in proper positioning.		
20.	Unhooked suspension straps and removed lift.		
21.	Positioned client comfortably and safely in chair, providing protector pads at pressure points on body.		
22.	Removed gloves (if applicable) and washed.		
23.	Documented time and client's response to procedure.
